TRAILER

ENCLOSED TRAILER

UNIQUE FEATURES

All Access Equipment offers three different size enclosed trailers that will work perfectly for your lift:

- 16 ft enclosed trailer for the 50 ft lift
- 20 ft enclosed trailer for the 60 ft lifts and,
- 24 ft enclosed trailer for the 83 ft lift.

All trailers come configured with a lengthy list of necessary options so the trailer will work best for you.

No need to guess what will work and what will not work. All trailers are ready to work with heavy duty specs and upgrades for this heavy piece of equipment, with adequate space, versatility and trailering safety.

White Luan backed vinyl walls

Extra heavy duty door/ramp upgrade. Door is capable of handling 8000 lbs - 9000 lbs load

18" tongue extension to prevent jack-knifing accidents.

Color: Choose color

Trailer weight as described above is estimated to be 2,800 lbs, which is about 30% lighter than a steel trailer. This is extremely light compared to steel trailers that weigh in close to 5,600 lbs in dead weight.

Note that this enclosed trailer has been substantially reinforced and upgraded, including 18" more ceiling height than standard trailer, additional stronger rear door reinforcement, additional floor reinforcement including 12" O/C instead of 16" O/C floor cross members, heavier duty coupler and additional reinforcement for the D rings. Above additions adds 21% to the cost.

The only other option you might want, besides the cabinets we talked about, would be the aluminum rims. They add \$102.00 per wheel x 4.

Price as specified above is \$24,987.00 before shipping.
